The Montessori Approach:

Montessori is a method of education based on the observations, methods and philosophy of Dr. Maria Montessori. This method focuses on the development of the whole child in all areas of life, and supports the child's interests and curiosity, developing a life-long love of learning.

Through their work, the children develop concentration and self-discipline. Within a framework of order, the children progress at their own pace and rhythm to help them reach their full potential.

Each classroom is under the guidance of specially trained teachers, who use Montessori designed teaching materials, and who come from fully accredited Montessori training programs.
